O'Neal Construction  
525 West William Street  
Ann Arbor, MI 48103

Attention: Mr. Paul Velin  
Construction Manager

Subject: NSF International Project

Dear Mr. Velin:

I have had past experiences working with Western Mechanical. Most recently I have had a good experience with Western Mechanical on a laboratory project at Wayne State University (WSU Tech Park One). The project consisted of converting a five story parking structure into a technology park used for laboratory functions. The mechanical and temperature controls were installed well and performed satisfactory. Western Mechanical reacted to resolve issues in a timely manner. I would recommend Western Mechanical based on my most recent past experiences. Feel free to call me if you have any other questions.

Sincerely,

PETER BASSO ASSOCIATES, INC.
